

# Why you should give a “HEK”: The Humankine® Advantage

Our human expression system ensures that proteins have native conformation and post-translational modifications to optimize biological activity. No expression tags, xeno-free... just high-quality proteins!

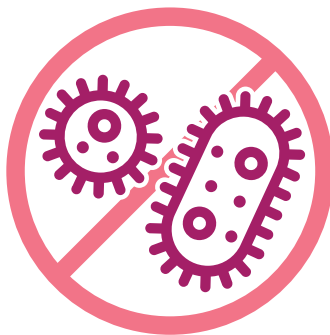

**Xeno and Animal  
Component Free**

**Endotoxin Free**

**Carrier and  
Tag Free**

All Humankine® Proteins are produced at Proteintech’s GMP laboratory and adhere to strict quality control regulations. All Humankine products can be seamlessly transitioned from research grade (RUO) to GMP.

# GMP-grade cytokines and growth factors: Guaranteed quality at every step

- ✓ Documented and validated processes
- ✓ Qualified personnel
- ✓ Qualified equipment and ISO 13485 cleanroom
- ✓ Raw Material qualification, documentation, and traceability
- ✓ Stringent in-process QC & final product QC release process
