MYCN Polyclonal antibody

Catalog Number:10159-2-AP

Featured Product

17 Publications

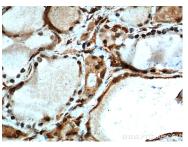

Basic Information	Catalog Number: 10159-2-AP	GenBank Accession Number: BC002712		Purification Method: Antigen affinity purification	
	Size: 150ul , Concentration: 800 µg/ml by Nanodrop and 347 µg/ml by Bradford method using BSA as the standard;	GenelD (NCBI): 4613		Recommended Dilutions: WB 1:500-1:3000 IHC 1:50-1:500	
	Source: Rabbit				
	Isotype: IgG	Calculated MW: 50 kDa			
	Immunogen Catalog Number: AG0193	Observed MW: 65-70 kDa			
Applications	Tested Applications:	Positive Controls:			
	IHC, WB,ELISA Cited Applications:	•		lacenta tissue, SKOV-3 cells, C6 cells, issue, SH-SY5Y cells, rat brain tissue	
	IF, IHC, WB	IHC : human thyroid cancer tissue,			
	Species Specificity: human, mouse, rat				
	Cited Species: human, mouse				
	Note-IHC: suggested antigen r TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0	vely, antigen			
	MYCN, also named as BHI HE37 and N	MYCN, also named as BHLHE37 and NMYC, is a transcription factor. It is primarily expressed in normal developing embryos and is thought to be critical in brain and other neural development. It is often amplified in human neuroblastomas. IR34A can suppress MYCN expression, it suggest MYCN has a role in cell growth. The expression of the MCYN is upregulated in a variety of human tumors, most frequently neuroblastoma, where the level of expression appears to increase as the tumor progresses. The calculated molecuar weight of MYCN is 50 kDa, but Phosphorylated MYCN is about 65-70 kDa. MYCN exsits two isoforms and MV of isoform is respectively 65 kDa and 45 kDa. (PMID: 19615087)			
Background Information	embryos and is thought to be critical neuroblastomas. IR34A can suppress the MCYN is upregulated in a variety expression appears to increase as the Phosphorylated MYCN is about 65-70	MYCN expression, it su of human tumors, mos e tumor progresses. The	ggest MYCN has frequently net calculated mo	t. It is often amplified in human s a role in cell growth. The expression roblastoma, where the level of ecuar weight of MYCN is 50 kDa, but

Selected Validation Data

human placenta tissue were subjected to SDS PAGE followed by western blot with 10159-2-AP (MYCN antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffinembedded human thyroid cancer tissue slide using 10159-2-AP (MYCN Antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
