For Research Use Only

Cyclin E1 Polyclonal antibody

Catalog Number:11554-1-AP

Featured Product

274 Publications

	Catalog Number: 11554-1-AP	GenBank Accession Number BC035498	 Purification Method: Antigen affinity purification
	Size:	GenelD (NCBI):	Recommended Dilutions:
	150ul , Concentration: 550 µg/ml by		WB 1:500-1:2000
	Nanodrop;	UNIPROT ID:	IHC 1:400-1:1600
	Source:	P24864	
	Rabbit	Full Name:	
	lsotype:	cyclin E1	
	IgG	Calculated MW: 410 aa, 47 kDa	
	Immunogen Catalog Number: AG2110		
		Observed MW: 47 kDa	
Applications	Tested Applications:	Positive Controls: WB : HT-29 cells, NIH/3T3 cells, mouse heart tissue,	
	WB, FC, IHC, ELISA		
	Cited Applications: WB, IF, IHC, CoIP	HeLa cells, Jurkat cells, human lung tissue, MCF-7 cells, HepG2 cells, K-562 cells, human placenta tissue	
	Species Specificity: IHC : mouse testis tissue, human placenta tissue human, mouse IHC : mouse testis tissue, human placenta tissue		
	Cited Species: human, rat, mouse, zebrafish, pig, Artemia sinica		
	Note-IHC: suggested antigen ı TE buffer pH 9.0; (*) Alternati retrieval may be performed w buffer pH 6.0	vely, antigen	
	Cyclin E1 (CCNE1) is a member of the highly conserved cyclin family, whose members are characterized by a dramatic periodicity in protein abundance through the cell cycle. CCNE1, an essential cyclin activating Cdk2, regulates the G1-S phase transition of the mammalian cell division cycle. Its timing expression plays a direct role i the initiation of DNA replication, the control of histone biosynthesis, and the centrosome cycle. CCNE1 is associate with disease progression in various malignancies and is associated clinically with poor prognosis. Two bands of Cyclin E1 were expressed in U2OS and MDA-MB-231 cells (PMID:9858585, PMID: 24112607).

Selected Validation Data

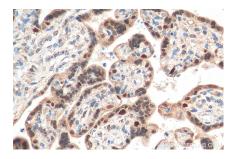

Various lysates were subjected to SDS PAGE followed by western blot with 11554-1-AP (Cyclin E1 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

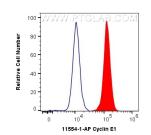

Immunohistochemical analysis of paraffinembedded mouse testis tissue slide using 11554-1-AP (Cyclin E1 antibody) at dilution of 1:800 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

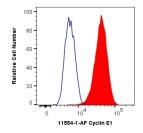

Immunohistochemical analysis of paraffinembedded human placenta tissue slide using 11554-1-AP (Cyclin E1 antibody) at dilution of 1800 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

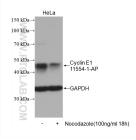

Immunohistochemical analysis of paraffinembedded human placenta tissue slide using 11554-1-AP (Cyclin E1 antibody) at dilution of 1:800 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

1X10^6 MCF-7 cells were intracellularly stained with 0.4 ug Anti-Human Cyclin E1 (11554-1-AP) and Coralite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Control Antibody. Cells were fixed and permeabilized with Transcription Factor Staining Buffer Kit (PF00011).

1X10⁶ HeLa cells were intracellularly stained with 0.4 ug Anti-Human Cyclin E1 (11554-1-AP) and Coralite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Isotype Control. Cells were fixed and permeabilized with Transcription Factor Staining Buffer Kit (PF00011).

Non-treated HeLa and nocodazole treated HeLa cells were subjected to SDS PAGE followed by western blot with 11554-1-AP (Cyclin E1 antibody) at dilution of 1:1200 incubated at room temperature for 1.5 hours. The membrane was stripped and re-blotted with GAPDH antibody as loading control.
