## For Research Use Only

## DYKDDDDK tag Polyclonal antibody (Binds to FLAG® tag epitope)

Catalog Number:20543-1-AP 855 Publications

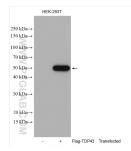

Basic Information	Catalog Number: 20543-1-AP	GenBank Accession Number: GeneID (NCBI):	Purification Method: Antigen affinity purification
	Size: 150ul , Concentration: 600 µg/ml by Nanodrop;	Full Name:	Recommended Dilutions: WB 1:20000-1:100000
	Source: Rabbit		
	lsotype: IgG		
	Immunogen Catalog Number: AG2329		
Applications	Tested Applications: WB, ELISA	Positive Controls: WB : Transfected HEK-293T cells,	
	Cited Applications: WB, IP, IF, FC, RIP, IHC, CoIP, ChIP		
	Species Specificity: recombinant protein		
	Cited Species: human, chicken, yeast, rat, sheep, mo duck	ouse, monkey, pig,	
Background Information	facilitates one or several of the follo expression. The DYKDDDDK(FLAG) po peptide can be expressed and detect N-terminal DDDDK vectors provide a be located on the surface of a fusion more likely to be accessible to antib recognition by an antibody, such as y protein purification, and in the study so on. This antibody is a rabbit polyce	wing characteristics: solubility, eptide has been used extensivel ed with the protein of interest as n Ek cleavage site for removal o protein because of its hydrophili odies. A DDDDK-tag can be used vestern blotting, immunocytoch of protein-protein interactions, lonal antibody raised against 3 <sup>3</sup>	of the fusion tag. The DDDDK peptide is likely to ic nature. As a result, the DDDDK peptide is I in many different assays that require emistry, immunoprecipitation, flow cytometry cell ultrastructure, and protein localization and

For technical support and original validation data for this product please contact: T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free E: proteintech@ptglab.com in USA), or 1(312) 455-8498 (outside USA) W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

HEK-293T cells and transfected HEK-293T lysates were subjected to SDS PAGE followed by western blot with 20543-1-AP (DYKDDDDK tag antibody) at dilution of 1:50000 incubated at room temperature for 1.5 hours.
