# For Research Use Only

# Acetyl-Tubulin (Lys40) Monoclonal antibody

Catalog Number:66200-1-lg

78 Publications

**Basic Information** 

Catalog Number: GenBank Accession Number: 66200-1-lg NM\_006009

ize: GeneID (NCBI):

150ul , Concentration: 1400  $\mu g/ml$  by  $\,$  7846 Nanodrop and 700  $\mu g/ml$  by Bradford  $\,$  UNIPROT ID:

method using BSA as the standard; Q71U36

Source: Full Name:

Mouse tubulin, alpha 1a Isotype: Calculated MW: IgG1 52 kDa

> Observed MW: 50-55 kDa

Purification Method:

Protein G purification

CloneNo.: 7E5H8

Recommended Dilutions:

WB 1:2000-1:10000 IHC 1:1000-1:4000 IF 1:50-1:500

# **Applications**

Tested Applications: WB, IF, IHC, ELISA Cited Applications: WB, IF, IHC

Species Specificity: human, mouse, rat, Canine, pig

Cited Species:

human, rat, mouse, zebrafish, pig, Drosophila, canine,

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (\*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

#### **Positive Controls**

WB: rat testis tissue, NCCIT cells, Neuro-2a cells, LO2 cells, pig cerebellum tissue, rat brain tissue, mouse ovary tissue, HEK-293 cells, mouse testis

IHC: mouse ovary tissue, human gliomas tissue, rat brain tissue, mouse brain tissue, human lung cancer tissue.

IF: MDCK cells, mouse brain tissue, islet

# **Background Information**

Tubulin, composed of heterodimers of alpha and beta tubulin, is the mainly component of microtubules which play important roles in cell motility, mitosis, and intracellular vesicle transport. Both alpha and beta tubulin undergo several posttranslational modifications such as polyglutamylation and acetylation/deacetylation. Tubulin acetylation occurs on lysine-40 at the N-terminal of alpha tubulin and is conserved across species. The histone deacetylase HDAC6 and SIRT2 has been identified as tubulin deacetylases. Reversible acetylation of alpha tubulin may be implicated in regulating microtubule stability, cell motility, and axon regeneration. The level of acetylated tubulin has been linked to epithelial malignancies and sensitivity to chemotherapy. In addition, acetylated tubulin has been widely used as a marker for primary cilia. This antibody is specific to the acetylated tubulin; it does not recognize non-acetylated tubulin. (24268707, 23881549)

## Storage

Storage

Store at -20°C. Stable for one year after shipment.

Storage Buffer

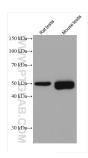

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

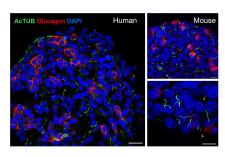

\*\*\* 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

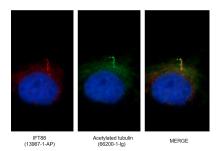

### Selected Validation Data

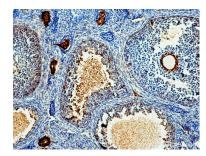

Various lysates were subjected to SDS PAGE followed by western blot with 66200-1-1g (Acetyl-Tubulin (Lys40) antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours.

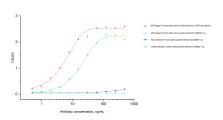

(left) Confocal image of a single-plane cross-section of a healthy human islet, showing primary cilia on both alpha cells (glucagon, red) and non-alpha cells (non-red). Acetylated alpha tubulin, cilia (green, Cat. No 66200-1-lg, 1:400), nuclei (blue), scale 20 µm. (right) Primary cilia in wildtype B6 mouse islets: acetylated alpha tubulin (green, Cat. No 66200-1-lg, 1:400), glucagon (red), nuclei (blue), single-plane images, scales 10 µm. (Fig from Dr. Jing Hughes)

Immunofluorescent images of MDCK cells stained for IFT88 rabbit pAb (13967-1-AP) and acetylated tubulin mouse mAb (66200-1-Ig) at dilution of 1:50, further stained with Alexa Fluor 594-conjugated AffiniPure Goat Anti-Rabbit IgG (H+L) for 13967-1-AP, and Alexa Fluor 488-conjugated AffiniPure Goat anti-Mouse IgG (H+L) for 66200-1-Ig.

Immunohistochemical analysis of paraffinembedded mouse ovary tissue slide using 66200-1-Ig (Acetyl-Tubulin (Lys40) antibody) at dilution of 1:2000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Specificity validation by indirect ELISA.
Indirect ELISA was carried out by coating
E.coli expressed GST-tagged Tubulin alpha
(70 ng/well), non-acetylated Tubulin alpha,
and Lys40 acetylated Tubulin alpha (with
excessive amount) followed by blocking and
adding serial diluted GST tag primary
antibody (Cat.NO. 66001-2-ig) and Acetylated
Tubuliln antibody 66200-1-lg respectively.
HRP-Goat anti-mouse secondary antibody was
used for detection. Signal was developed with
