

Catalog Number: HZ-1145-GMP

## **Data Sheet**

Animal Component-Free

Human cell expressed

Tag-Free

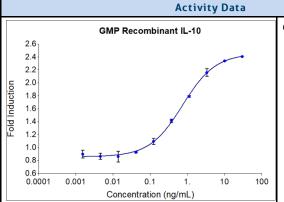

**Endotoxin Free** 

## **Product Description**

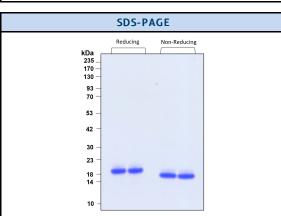

Animal-free GMP Recombinant Human IL-10 is expressed in human 293 cells as a non-covalent homodimeric glycoprotein with an apparent molecular mass of 17 kDa. This cytokine is produced in a serum-free, chemically defined media. GMP IL-10 is produced by a variety of mammalian cell types which includes T cells, B cells, macrophages, and keratinocytes monocytes. It is an anti-inflammatory cytokine with multiple, pleiotropic effects in inflammation and immunoregulation. Glycosylation contributes to stability in cell growth media and other applications. The cytokine is greater than 95% pure.

Alternative Names	CSIF, IL 10, IL10, IL10A, interleukin 10, TGIF	
Accession Number	P22301	
Source	Human Embryonic Kidney cells (HEK293). HEK293-derived IL-10 protein	
Species Reactivity	human, mouse	
Adventitious Virus	dventitious Virus Master Cell Bank tested Negative for Adventitious Viruses	

Specifications					
Test	Method	Specification			
Activity	Dose-dependent proliferation of the MC/9 (mouse mast cell) cell line	0.18-2.0 ng/mL EC50			
Molecular Mass	SDS-PAGE	17 kDa, non-disulfide bonded homodimer, glycosylated			
Purity	SDS-PAGE	>95%			
Endotoxin	LAL	<0.1 EU/μg			
Mycoplasma PCR		Not Detected			

GMP Recombinant human IL10 (HZ-1145-GMP) induces
dose-dependent
proliferation of the MC/9
(mouse mast cell) cell line.
Cell number was
quantitatively assessed by
PrestoBlue® cell viability
reagent. MC/9 cells were
treated with increasing
concentration of GMP
recombinant IL-10 for 48
hours. The EC50 was
determined using a 4parameter non-linear

Purity of GMP recombinant human IL-10 was determined by SDS- polyacrylamide gel electrophoresis. The protein was resolved in an SDS- polyacrylamide gel in reducing and non-reducing conditions and stained using Coomassie

Preparation				
Shipping Temperature				
Formulation	Formulation 10mM Tris-HCl pH 7.4 + 150mM NaCl, See Certificate of Analysis for details			
Reconstitution  Briefly centrifuge the vial before opening. It is recommended to reconstitute the protein in sterile 1xPBS pH 7. endotoxin-free recombinant human serum albumin (HSA).				

Stability and Storage	Product Form	Temperature Conditions	Storage Time (From Date of Receipt)	
	Lyophilized	-20°C to -80°C	Until Expiry Date	
	Lyophilized	Room Temperature	2 weeks	
	Reconstituted as per CofA	-20°C to -80°C	6 months	
	Reconstituted as per CofA	4°C	1 week	
	Avoid repeated freeze-thaw cycles.			

## Proteintech GMP Quality Policy HumanKine® GMP Proteins

Invitro recombinant protein production can be prone to variability due to various reasons ranging from quality of raw materials to inconsistency in the process. Therefore, HumanKine®, a proteintech brand's GMP proteins are produced and tested under an ISO 13485 certified quality management system in a clean room facility. Proteintech manufactures the GMP HumanKine® products according to the applicable sections in the following documents: USP Chapter 1043 (Ancillary Materials for Cell, Gene, and Tissue-Engineered Products, USP Chapter 92 (Growth Factors and Cytokines Used in Cell Therapy Manufacturing), WHO TRS, No. 822, 1992 Annex 1 (Good Manufacturing Practices for Biological Products), Ph. Eur. General Chapter 5.2.12, and EudraLex – Volume 4 – Part IV (Guidelines on GMP specific to ATMPs). Proteintech strives to achieve the utmost quality GMP raw material ensuring all applicable guidelines are taken into consideration.

The QMS is built to provide our customers with consistent and pure product delivered by documented processes, qualified personnel, validated processes, qualified equipment, qualified vendors, and a stringent final product release process. Although the final product release process is important, Proteintech performs in-process QC steps after each major manufacturing stage. Production records and facilities may be available for an inspection by approved personnel.

Our GMP policy covers all the aspects of production; from raw materials, facility, equipment, and Instruments to training and personal hygiene of staff. It also guarantees that the process is explicit, validated and well documented for transparency and traceability.
