

Catalog Number: HZ-1285-GMP

Data Sheet

Animal Component-Free

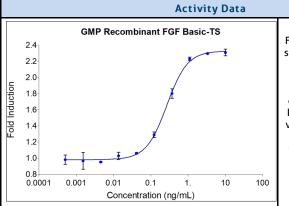

Human cell expressed

Tag-Free

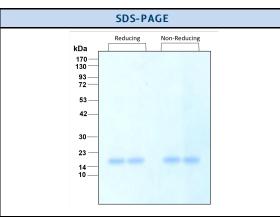

Endotoxin Free

Product Description					
Animal-free Recombinant Human FGFbasic-TS is expressed in human 293 cells with an apparent molecular mass of 17 kDa. This cytokine is produced in a serum-free, chemically defined media.					
Alternative Names	rnative Names Basic fibroblast growth factor, BFGF, FGF basic, FGF basic-TS, FGF2, FGFB, FGFbasic, FGFbasic-TS, HBGF 2				
Accession Number	P09038				
Source	Human Embryonic Kidney cells (HEK293). HEK293-derived FGFbasic-TS protein				
Species Reactivity	human,mouse				
Adventitious Virus	Master Cell Bank tested Negative for Adventitious Viruses				

Specifications					
Test	Method	Specification			
Activity	Dose-Dependent stimulation of proliferation of NIH3T3 cells in Defined Media	0.4-2.5 ng/mL EC50 in NIH3T3 cells in defined Media			
Molecular Mass	SDS-PAGE	17 kDa reduced and non-reduced, monomer, non- glycosylated			
Purity	SDS-PAGE	>95%			
Endotoxin	LAL	<0.1 EU/μg			
Mycoplasma	PCR	Not Detected			

GMP Recombinant human FGFbasic-TS (HZ-1285-GMP) stimulates dose-dependent proliferation of the HDFa human primary fibroblast cell line. Cell number was quantitatively assessed by Promega CellTiter 96® cell viability reagent. HDFa cells were treated with increasing concentrations of GMP recombinant FGFbasic-TS for 48 hours. The EC50 was determined using a 4-parameter non-

Purity of recombinant human FGFbasic-TS was determined by SDS- polyacrylamide gel electrophoresis. The protein was resolved in an SDS- polyacrylamide gel in reducing and non-reducing conditions and stained using Coomassie

Preparation				
Shipping Temperature	ambient temperature			
Formulation	ulation 1x PBS, See Certificate of Analysis for details			
Reconstitution is recommended at 0.2 mg/mL using sterile 1x PBS pH 7.4 containing 0.1% endotoxin-free recombines serum albumin (HSA).				

	Product Form	Temperature Conditions	Storage Time (From Date of Receipt)
	Lyophilized	-20°C to -80°C	Until Expiry Date
Stability and Storage	Lyophilized	Room Temperature	2 weeks
	Reconstituted as per CofA	-20°C to -80°C	6 months
	Reconstituted as per CofA	4°C	1 week
		Avoid repeated freeze-thaw cycles.	

Proteintech GMP Quality Policy HumanKine® GMP Proteins

Invitro recombinant protein production can be prone to variability due to various reasons ranging from quality of raw materials to inconsistency in the process. Therefore, HumanKine®, a proteintech brand's GMP proteins are produced and tested under an ISO 13485 certified quality management system in a clean room facility. Proteintech manufactures the GMP HumanKine® products according to the applicable sections in the following documents: USP Chapter 1043 (Ancillary Materials for Cell, Gene, and Tissue-Engineered Products, USP Chapter 92 (Growth Factors and Cytokines Used in Cell Therapy Manufacturing), WHO TRS, No. 822, 1992 Annex 1 (Good Manufacturing Practices for Biological Products), Ph. Eur. General Chapter 5.2.12, and EudraLex – Volume 4 – Part IV (Guidelines on GMP specific to ATMPs). Proteintech strives to achieve the utmost quality GMP raw material ensuring all applicable guidelines are taken into consideration.

The QMS is built to provide our customers with consistent and pure product delivered by documented processes, qualified personnel, validated processes, qualified equipment, qualified vendors, and a stringent final product release process. Although the final product release process is important, Proteintech performs in-process QC steps after each major manufacturing stage. Production records and facilities may be available for an inspection by approved personnel.

Our GMP policy covers all the aspects of production; from raw materials, facility, equipment, and Instruments to training and personal hygiene of staff. It also guarantees that the process is explicit, validated and well documented for transparency and traceability.
